

YZ-230VM

Hydraulic Vibratory High Frequency & **Variable Moment** Pile Driving & Extracting Hammer

## **Features & Benefits**

Piling hammer Manufacturer

**SCHAEFFLE** 

**YZ-230V**N

perfect designed suppressor house with low weight provide more driving and extracting capability

Heavy duty lifting pin for easy rigging and maximum saftety

Red colored safty pin for the rubber block

Deep bored top steel plate let hydraulic oil go throuth it, provide more heat dissipation way

Forced lubrication hydraulic motor power by eccentric block gears, for eccentric bearings

Filter catridge for forced lubrication system

FAG X-life giant spherical bearings provide 5 times durability than those found on other vibro hammer

Eccentrics block filled with "Heavy Metal" provide extra driving & extracting capability

One piece eccentric/gear part design eliminateds bolts, keyways, splines and pins etc. other parts

Eccentric block Moment adjusting motor power by a hydraulic oil, provid variable moment for more smooth piling process.

Clamping jaw block make from Super hard alloy material provinding extreme long working life.

Forged hydraulic clamping body provide perfect clamping performance for piles

Bosch Rexroth hydraulic high speed motor, The best motor available on the market for vibro hammer. The hydraulic motor adopts embedded mechanical design montanted on the vibrating hammer body. Avoid damage due to lifting movement Perfectly.

BOSCH rexroth manuli

Technical Parameters

Eccentric Moment:	0-40 kgm
Max. Frequency:	2300 rpm
Rated Centrifugal Force:	0-2320 kN
Max. Centrifugal Force:	2920 kN
Max. Line Pull Force:	800 kN
Max. Amplitude:	19 mm
Max. Oil Flow:	890 L/min

Amplitude Equation:

$$A = \frac{2 \times Mt}{Mv} \quad Mt = \frac{Mt}{Mv} = \frac{Mt}{A} = A$$

Mt = Eccentric Moment (kgm) Mv = Total Vibrating Weight (kg) A = Amplitude (mm)

About Vibrating weight Mv:

The vibrating weight is the sum of all the weights of the vibrating mass.

Note: Calculate pipe pile weight using the following formula:

(O-T) \* T \* 0.0246615 \* H

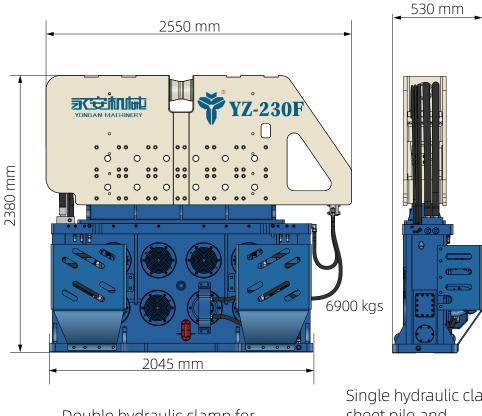

- O = Outside Diameter of pipe piles
- T = Wall Thickness of Pipe Piles
- H = Hight of the pipe piles

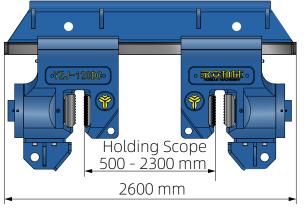

Ible Moment Vibro Hammer

# Size & Weight

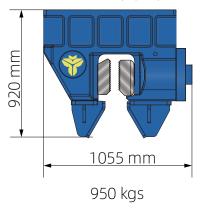

Double hydraulic clamp for Big size of pipe piles

3250 kgs

Single hydraulic clamp for sheet pile and small size of pipe piles

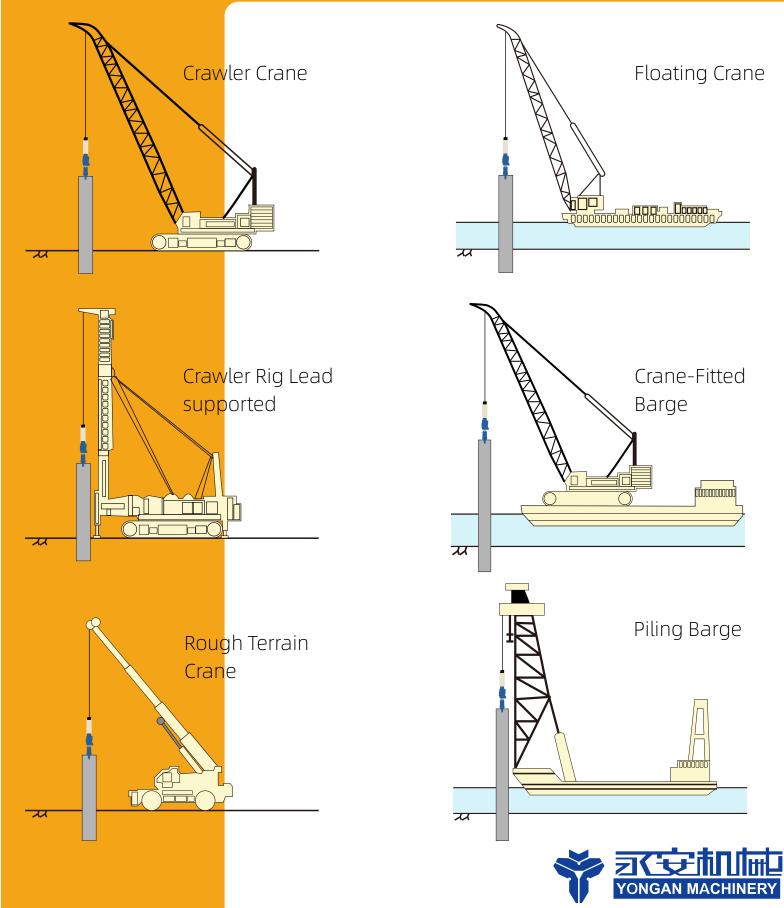

Clamping Force: 1200 kN Working Pressure: 320 bar

loment < I bro ammer P R

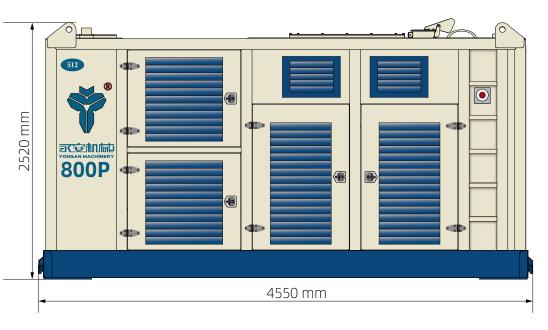

# **Piling Applications**

## Hydraulic Power Pack

- ♣Engine: Cummins, CAT, Volvo
- Max. Power:522 Kw/746 HP
- Max. Frequency: 2100 rpm
- Working Pressure: 320 bar
- ♦Max. Oil Flow: 800 L/min
- ₱ Diesel Tank Volume: 600 L

#### Feature:

#### Economical and durable

Uses a high-performance Rexroth hydraulic plunger pump that pursues economy and durability

#### Quietness and portability

Compact and lightweight body that takes into consideration quietness and portability by making full use of soundproofing technology.

#### Environmental

- Equipped with a third exhaust gas countermeasure engine optional, or take a electric motor instead of diesel engine.
- ■Uses biodegradable fats and oils as grease.

#### Functional

Yongan hydraulic power pack both can support for hydraulic vibro hammer and hydraulic impact hammer.

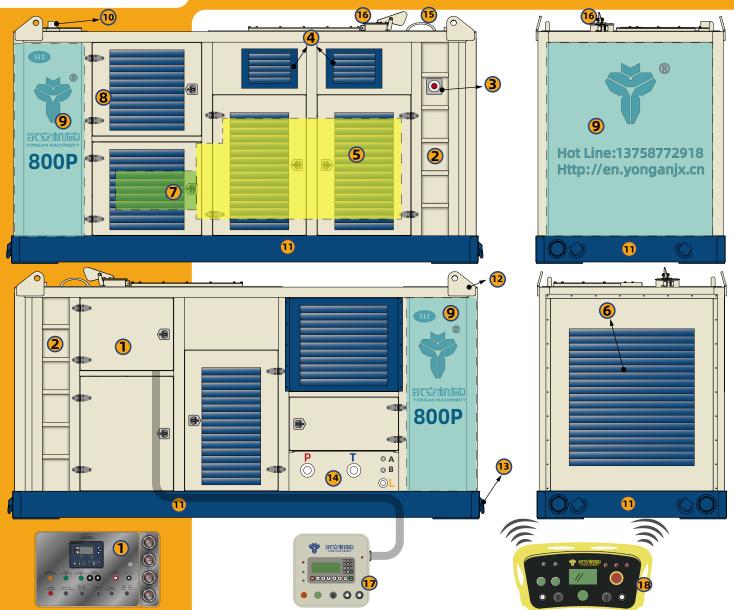

- Hydraulic Oil Tank Volume: 2200 L
- Weight: 9000 KGS

### Hydraulic Power Pack

 Local control & instrument panel 2. ladder 3.emergency stop switch 4. Engine intake
Diesel Engine 6. Engine heat sink 7. Rexroth hydraulic pump 8. isolated heat sink for hydraulic oil 9. hydraulic oil tank 10. hydraulic oil filling port 11. Diesel oil tank
uppper 4 lifting hooks 13. below 4 lifting hooks 14. Quick Coupling hydraulic oil port panel (P. pressure T. Return L. drain A.pressure for clamp B. return for clamp)
handle for ladder 16. engine exhaust port 17. wired remote control box
wireless remote control box
